Comments:

Mrs. Hamrick could not locate a plan. She said she would check on it and contact me. On 5-12-75 I received a letter from Mrs. Hamrick suggesting that I call Mr. Harold McHail of ARCO in Pittsburgh (412-562-1961). I contacted Mr. McHail on 5-14-75. He said he thought a plan had been prepared and he would call back.

On 5-14-75, Mr. Steven Wolf, lawyer for ARCO, called back and said there apparently had been no preparation of a plan for the facility. Mr. Wolf indicated that they might contest the need for a plan on the basis of section 112.1 (a) (4).

Total storage capacity at the facility is 37,000 gallons.

Comments:

Total storage capacity is 200,000 gallons, all underground.

The plan was prepared by Texaco Engineers out of Columbus, Ohio. The plan was not signed by an engineer but is in the process of being certified.

This facility is new, and began operating in August of 1974.

Comments:

Mr. Farrell could not locate the plan at the time of my visit. The individual responsible for such matters was not in at the time.

On 4-21-75 Mr. Tom Gimbus called and said they did have a plan and agreed to mail a copy to me. A copy of the plan was received on 4-22-75. The plan was not signed by an engineer, however, so I discussed that with Mr. Gimbus. He will check with his people and see that the plan is properly certified.
